

10-POINT RAMS PRE-SEND CHECK

A quick check for UK trades and small contractors before sending job RAMS to a client or principal contractor.

■ 1	Job, client, site address and exact work area are correct.
■ 2	Scope of work is clear — including what is not included.
■ 3	Significant hazards for this actual task/site have been identified.
■ 4	Controls written down are genuinely in place and workable.
■ 5	PPE/RPE and equipment requirements match the task.
■ 6	Site-specific emergency, access and welfare arrangements are recorded.
■ 7	Risk ratings have been reviewed after controls are applied.
■ 8	Method statement follows the real work sequence.
■ 9	Workers have been briefed and any required permits/supporting documents are ready.
■ 10	RAMS has a date/revision and will be reviewed if the work or conditions change.

Reminder: A template is a starting point. RAMS should be suitable and sufficient for the actual work and site; do not rely on untailored tick boxes.

Need a faster starting point? UK Trades RAMS Professional Quick-Fill Kit — fillable PDF with job details, hazard/control prompts, risk assessment, method statement, sign-off and continuation sheet.
